# Pitt-Bradford Cable FAQs

## What equipment do I need to watch cable TV on campus?

- ✓ Digital TV w/ QAM digital tuner
- ✓ Coaxial cable

Your TV set must have a QAM digital tuner in order to view the digital signal. TVs that have a “flat screen” or are “HD ready” may not have a QAM tuner, so please check the manual.

If you are considering purchasing a new TV, we recommend that you **NOT** purchase the following models as they may experience problems working with the cable system:

- Emerson LC320EM2F
- Emerson LC401EM2F
- Insignia (all models)
- Magnavox P2MF23ID/37
- Sylvania LC220SL1
- Sharp 32” Aquos

If you have one of these models and are experiencing problems, you can resolve the issue by purchasing a converter box (please see the next section to learn more about converter boxes).

## How do I make my older TV work on the school’s digital cable system?

If you have an older analog television, you will need to purchase an Clear QAM compatible digital-to-analog converter box. Students can purchase a box online. The Bookstore will also have several boxes available for sale or to rent.

## How do I program channels into my TV?

The steps for programming TV sets vary with each manufacturer and model. Please refer to your TV’s manual for more specific instructions. In general, the procedure is as follows:

- Step 1: Press the “Menu” Button
- Step 2: Select “Set-Up”
- Step 3: Select “Antenna” then “Cable”
- Step 4: Select “Auto Program/Auto Tune” then “OK”

The scan may take a between 20 - 45 minutes to complete. If you are having trouble programming your television, please contact the Housing Office at 814-362-7630.

### **How do I view programs in high definition?**

To view high definition (HD) programs, you must have an HD television set.

Finally, the program you are viewing must be broadcasted in HD. Some networks may show classic content in a standard definition format. Please remember that HD cannot be viewed if you are using a converter box.

### **I don't see a channel I want. Can I order it?**

Students cannot order a specific channel for their room only. However, residents are able to request changes to the lineup for the entire campus. Student Government makes recommendations for changes to the channel lineup each term. If you have a request that you would like to make, please contact a Student Government representative. Not all channels are available through our cable service provider.

### **How do I report problems with my cable service?**

Problems with the cable service should be reported to the CTM Services Office 362-7660. A member of the CTM Services staff will help you resolve the issue if possible or report it to the appropriate person for action.
